

CMRT 1923 | Company & Supply Overview

Aegean Olive Oil Built For Your Market

BOTTLED · PRIVATE LABEL · BULK

Four generations at the source. Modern control at scale.

CMRT 1923 is an olive oil producer and packer based in Ayvalık, Türkiye. The company's production experience spans four generations and is supported by integrated production, storage, bottling and export-preparation capabilities.

7,000 METRIC TONS
Annual production capacity

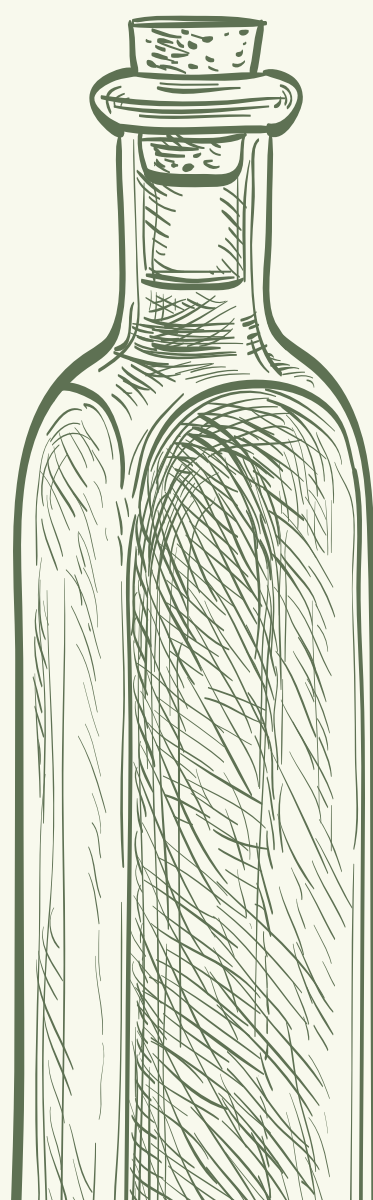

One producer. Three commercial routes.

Choose the supply model that fits the business—without changing the origin, production control or technical standard. Every programme begins with an agreed product category, specification, quantity, destination and delivery requirement.

BOTTLED

CMRT-branded products for retail, hospitality and professional kitchens.

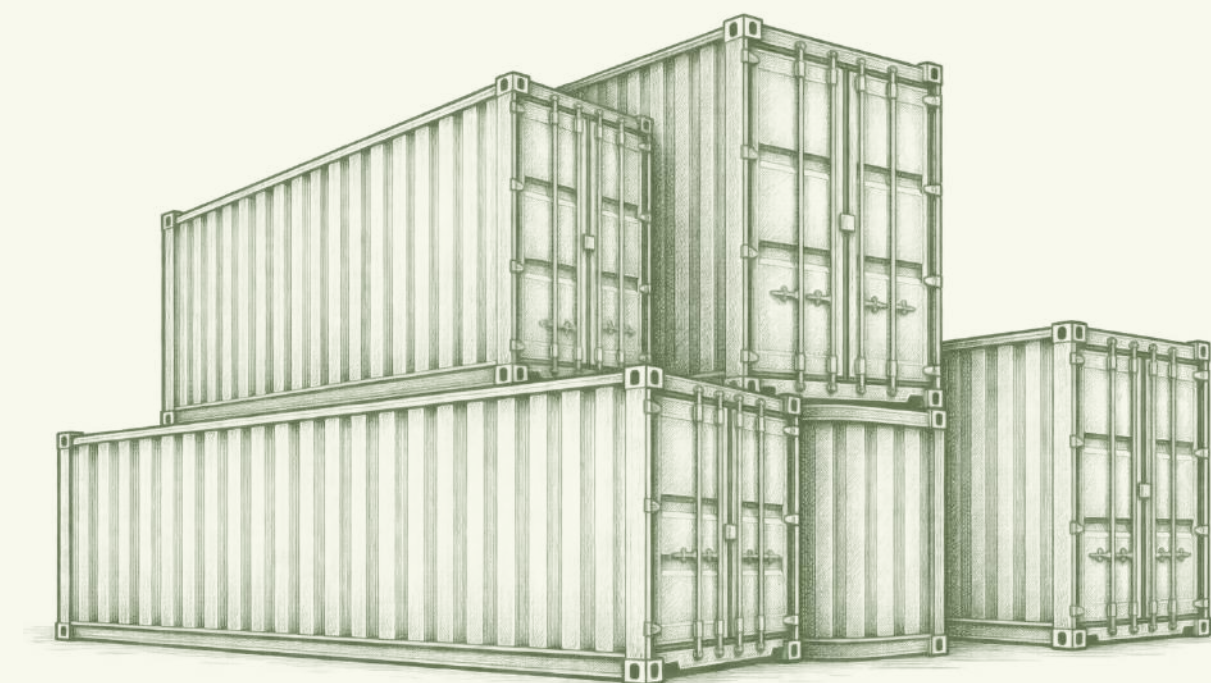

PRIVATE LABEL

Oil and packaging programmes developed around the target market and channel.

BULK

Flexitank supply for importers, bottlers, packers, distributors and food manufacturers.

Every oil has a clear commercial role.

EARLY HARVEST EVOO

Flagship positioning, vivid sensory character and batch-specific polyphenol analysis.

COLD PRESSED EVOO

Core premium products for retail, table service and everyday use.

EXTRA VIRGIN OLIVE OIL

A versatile core range for retail and foodservice, bringing Aegean character to everyday cooking, dressings and finishing.

VIRGIN OLIVE OIL

Virgin olive oils for high-volume culinary applications.

Every oil has a clear commercial role.

OLIVE OIL

A blend of refined and virgin olive oils, offering a mild flavour for everyday cooking across retail and foodservice.

OLIVE POMACE OIL

A blend of refined olive-pomace and virgin olive oils, offering a neutral flavour for frying and high-volume professional cooking.

Bottled supply that fits the channel.

CMRT-branded olive oils are available for retail, hospitality and professional kitchens in confirmed glass, PET and tin formats.

RETAIL

Shelf-ready formats for specialist and mainstream distribution.

HOSPITALITY

Table-service products designed to complement the guest experience.

FOODSERVICE

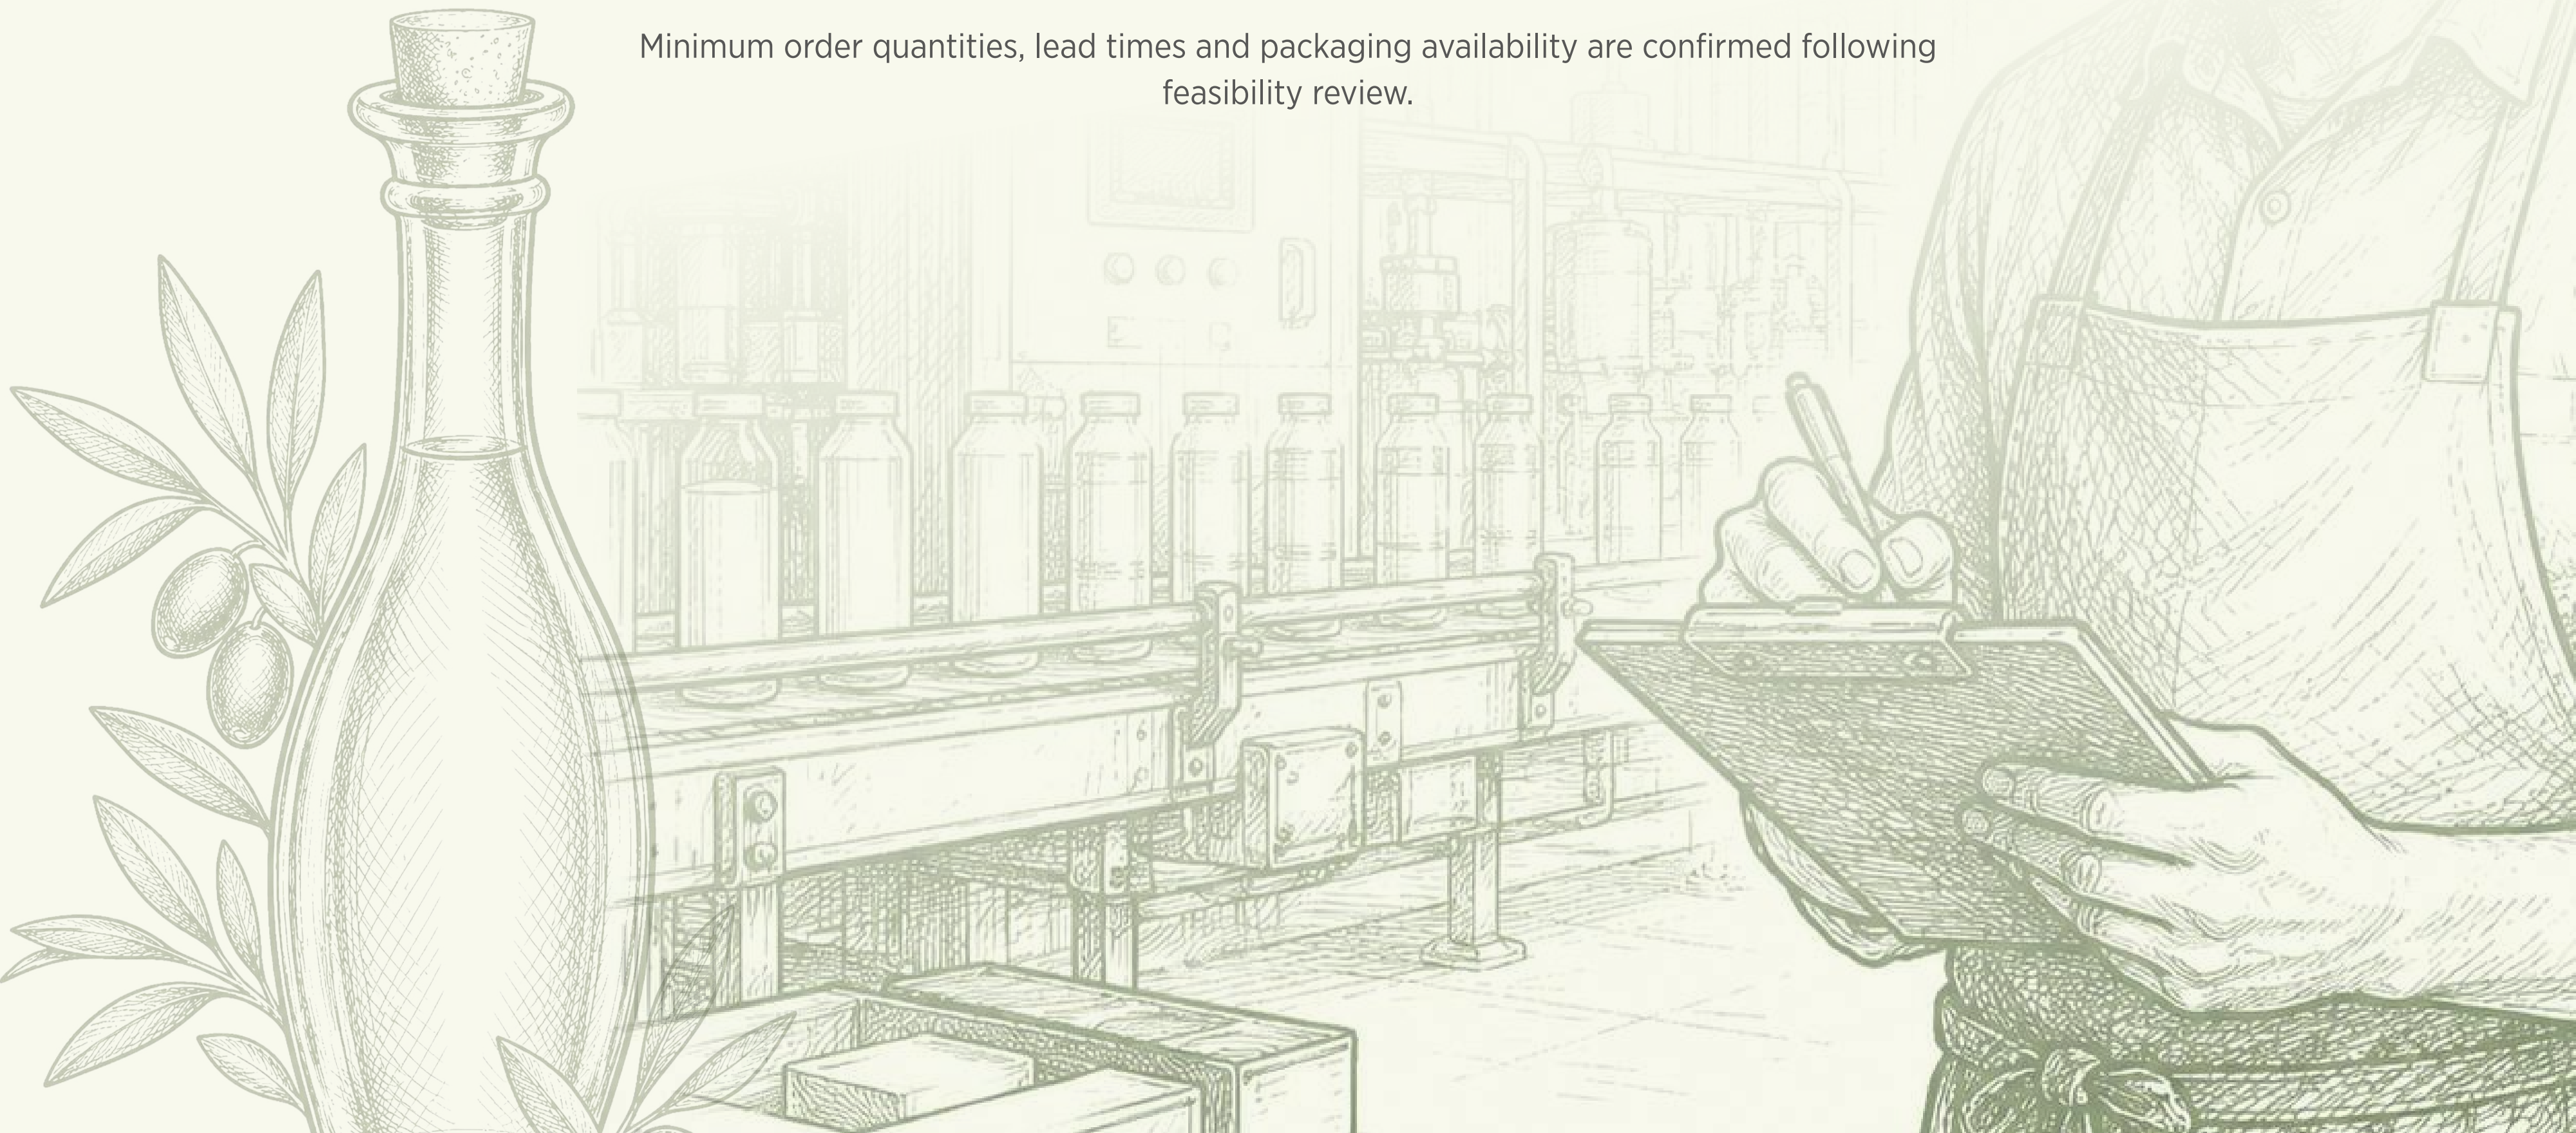

Professional formats for consistent everyday kitchen use.
Selected formats from 250ml 5l.

Private Label

Market and channel brief Product category and specification Pack format and artwork coordination Sample and approval Bottling and export preparation

For confirmed products, CMRT can provide the applicable pack size, case configuration, barcode information, pallet configuration, shelf life and technical specification.

Minimum order quantities, lead times and packaging availability are confirmed following feasibility review.

Bulk Supply Is Contracted By Specification, Batch And Shipment

CMRT supplies selected olive oil categories in food-grade flexitanks for buyers that bottle, pack, distribute or manufacture locally.

Controlled Water. Distinctive Olive Oil.

Purposeful infrastructure supporting premium product quality and responsible production.

Water used during olive processing passes through dedicated filtration and softening systems before use. Filtration supports clean process water, while softening helps control water hardness and mineral variation. Together, these systems support consistent processing and help protect the intended aroma, flavour and balance of the finished olive oil.

CMRT's on-site wind turbine also contributes renewable electricity to olive oil production, integrating responsible energy use into the way we produce at scale. This level of control contributes to the distinctive quality of CMRT olive oil: clean sensory expression, consistent character and a finished product created with exceptional attention at every stage.

CONTROLLED PROCESS WATER

Filtered and softened water used during olive processing.

DISTINCTIVE SENSORY QUALITY

Supporting clean aromas, balanced flavour and the natural character of the oil.

RESPONSIBLE PRODUCTION

On-site wind energy contributing renewable electricity to production.

Every element managed around the quality of the finished olive oil.
